

Baltic sauna
traditions reborn
in a modern design

YAUYA is born, developed and
produced in the Baltics.

YAUYA Sauna Characteristics

Full wood construction

Refined through generations and assembled from local timber, the traditional log-house structure contains no plastic and ensures long-lasting enjoyment.

Atmospheric windows

The modest windows ornament is inherited from the traditional Baltic bath houses. It sets a mood with soft interior lighting and an intimate panorama to the surroundings.

Unique wide platform

The large platform in YAUYA sauna houses invites you to lay down, stretch your legs and immerse into the rejuvenating warmth of steam.

Wood burning stove

Wood heating offers liberty from grid and the archaic cosiness of wavering fire. Although we can offer other heating methods, we love the pureness of log fire.

YAUYA-S

YAUYA-S

Our most compact sauna model is designed for your backyard or beside your countryside stay. Being reduced to perfection, the only thing it requires is just 5 m² of land and a handful of firewood. The rest is up to you.

Comes with

- hexagonal steam-room
- high-quality wood burning stove
- large platform & movable benches
- optional electric light installation

Size: 4-5 people

YAUYA-S Specifications

Size: 4-5 people

Floor: 4.2 m²

Volume: 8.5 m³

Height: 1.70 - 2.25 m

l/w/h: 2.82 / 2.44 / 2.50 m

Weight: ~ 1.000 kg

Material: Fir Corpus &
Black Alder Benches

Heating: Standard:
Firewood stove
„HUUM Hive Flow Mini“

YAUYA-S Features

Charred timber surfaces

The solid wood construction is treated with fire and impregnated with water-based, pigmented glaze. This provides traditional, long-lasting protection against weather and pest infestation, along with an unparalleled surface texture.

Copper drip edge

At the junction of the roof and wall, a decorative copper sheet protects the construction. Over time, the untreated material develops a distinctive patina.

Wooden roof cladding

The roof covering follows traditional roofing principles, providing natural protection against the elements. Its ventilated design ensures durability, and if necessary, it can be easily repaired by hand.

Understatet details

Subtly placed design elements emphasize the unobtrusive design language of YAUYA saunas.

YAUYA-S Features

Ventilation

The steam room contains several ventilation openings that provide adjustable airflow. This helps regulate the essential elements of heat, oxygen and steam inside the sauna.

Solid door

The solid wood sauna door is inspired by traditional sauna buildings. Its extra-low height helps retain as much warm air as possible while also serving as a respectful gesture of entry.

Huge platform

The large platform in YAUYA sauna houses is unique in the sauna world. It invites you to shift between different positions during your bathing session and can comfortably accommodate multiple steam bathers on the upper level.

YAUYA-S Features

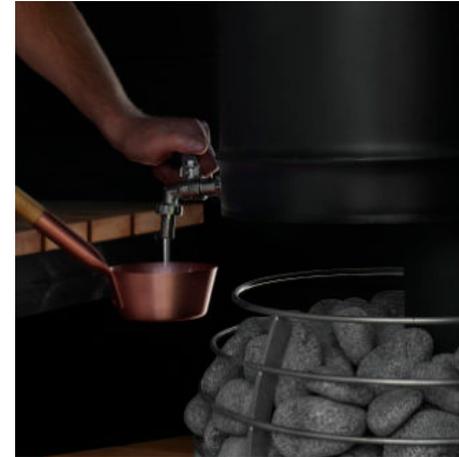

Window freeze

The modest windows ornament is inherited from the traditional Baltic bath houses. It sets a mood with soft interior lighting and an intimate panorama to the surroundings.

Wood burning stove

Wood heating offers liberty from grid and the archaic cosiness of wavering fire. That's why our saunas come standard with the award-winning HUUM Hive sauna stove. While we can offer other heating options, we love the purity of a real log fire.

Water heating tank

The generous tank above the stove gently heats the water with the sauna stove's residual heat. It provides soothing hot water to create steam for infusions and a range of calming steam bath rituals.

YAUYA-M Features

Movable benches

The movable benches allow you to customize the sauna room to your liking. Whether you need more space for a sauna master, to place accessories, or even as a cozy seat for sunbathing outdoors.

Electrical and lighting setup

Beyond its two power outlets, the sauna is equipped with five individually switchable sources of soft, indirect light. Together, they let you shape a wide range of lighting moods – from calm and meditative to warm and inviting.

Naturally oiled surfaces

The interior has been treated with a natural wax specially designed for sauna rooms. It helps the wood respond to the strong fluctuations in temperature and humidity, while its pigmentation bathes the room in a warm, atmospheric twilight.

YAUYA-M

YAUYA-M

Our larger sauna model means more comfort. Hang around in the multifunctional pre-room after bathing in the extra spacious steam-room. Stretch out and forget about everything else.

Comes with

- hexagonal steam-room
- high-quality wood burning stove
- large platform & movable benches
- unique pre-room design
- electric installation
- different light scenarios

Size: 6-7 people

Product development

The founding team consists of a certified bath master, professional architects and design creatives.

YAUYA is brought to life in the plains of forested Lithuania, where steam bathing has been the way of living for millennia. We create genuine sauna houses by adapting the essentials of Baltic steam bathing. Our saunas are designed by passionate sauna lovers and built by the hands of experienced craftsmen.

We are keen to share our passion!

Embrace nature - Elevate relaxation
